

# Décomposer un nombre

Pour décomposer un nombre, je l'écris sous la forme d'une addition :

$$253 = 200 + 50 + 3$$

$$253 = 100 + 100 + 10 + 10 + 10 + 10 + 10 + 3$$

Diagram illustrating the decomposition of 253 into 100, 100, 10, 10, 10, 10, 10, and 3 using base ten blocks. The first 100 is represented by one blue 10x10 square. The second 100 is represented by one blue 10x10 square. The five 10s are represented by five green 1x10 rods. The 3 is represented by three yellow 1x1 squares.
